Ifedayo Adekoya - Android Developer

Ontario, Canada | Eligible to work in Canada | dayorolands60@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

- Android Developer with 8+ years of experience building production Android apps, SDKs, and platform capabilities across travel commerce, banking, fintech, and device-integrated environments.
- Strong Kotlin and Java experience with Jetpack Compose, Kotlin Multiplatform, modular architecture, MVVM/MVI, Coroutines, Room, and scalable feature delivery.
- Known for turning complex product, backend, compliance, and device requirements into maintainable mobile experiences with reliable release quality.

TECHNICAL SKILLS

Core Android: Kotlin, Java, Jetpack Compose, XML, Android SDK, Kotlin Multiplatform, Compose Multiplatform, Coroutines/Flow, Room, SQLite, ADB

Architecture & Tooling: MVVM, MVI, MVP, modular architecture, Dagger/Hilt, Koin, Git, Bitbucket, Azure DevOps, GitHub Actions, AppCenter

APIs, Testing & Observability: RESTful APIs, GraphQL, unit testing, Espresso, Firebase Analytics, Firebase Crashlytics

Cross-Platform & Delivery: KMP shared modules, large codebase maintenance, feature rollout, code review, CI/CD collaboration, React Native and Swift familiarity

PROFESSIONAL EXPERIENCE

Senior Android Developer **Jan 2026 - Present**

Priceline.com - Ontario, Canada

- Contribute to Priceline's North America Android team, building and maintaining checkout experiences used across flights, hotels, and car rental booking flows.
- Work on the insurance portion of the Android checkout journey, including coverage selection, eligibility states, pricing display, and confirmation experiences.
- Build Kotlin Multiplatform-backed functionality for insurance checkout flows, sharing domain logic and state handling where appropriate to keep behaviour consistent across supported client surfaces.
- Deliver Kotlin and KMP feature work in a large production codebase, collaborating with backend, product, design, QA, and release teams to ship reliable customer-facing changes.
- Support checkout quality through code reviews, regression validation, crash investigation, and careful handling of edge cases in a conversion-sensitive purchase flow.

Senior Android Developer **May 2025 - Jan 2026**

FairMoney Microfinance Bank - Lagos, Nigeria

- Contributed within a 26-member Android team on the FairMoney app, using Kotlin and Kotlin Multiplatform to build scalable financial-service features.
- Implemented the Phone Number as Account Number feature using KMP, helping more than 10M customers receive transfers through their registered mobile numbers.
- Built an account-number-based bank suggestion algorithm that improved bank selection accuracy and reduced friction in customer transfer flows.
- Developed and maintained shared KMP modules, improving business-logic reuse while reducing platform-specific defects and long-term maintenance effort.

Senior Android Developer **Dec 2023 - Feb 2025**

Orda Africa - Lagos, Nigeria

- Led Android development for the Orda merchant app's checkout and transaction workflows, turning complex restaurant requirements into reliable production features.
- Built reusable device-integration and transaction modules that allowed one Android codebase to support multiple terminal environments with consistent UI and state handling.
- Improved app maintainability by separating business rules, networking, and presentation concerns across modular Kotlin components.
- Delivered a restaurant tipping feature with clerk attribution, coordinating Android, backend, QA, and operations work through release and rollout.

Function Lead, Frontend (Internet and Mobile) **Jun 2022 - Nov 2023**
Qore - Lagos, Nigeria

- Led development of the SurePadi Agent app and 7+ white-label variants for banking partners, balancing partner requirements, delivery timelines, and regulatory expectations.
- Built modular Kotlin frameworks and reusable SDK components that accelerated feature rollout and simplified maintenance across related financial-service apps.
- Integrated Jetpack Compose into legacy XML screens for 50,000+ agents while mentoring Android developers on Kotlin, clean architecture, and consistent implementation patterns.

Lead Android Engineer **Oct 2021 - May 2022**
eTranzact International Plc - Lagos, Nigeria

- Spearheaded development of the PocketMoni Android app, enabling bill payments, transfers, cash-out, and airtime workflows for agent banking users.
- Redesigned key app modules using Java and MVVM, reducing code complexity and making the codebase easier for new developers to maintain.
- Improved reliability by resolving memory leaks, threading issues, and integration defects affecting remote cash-out and agent transaction workflows.

Android Developer / POS Implementation Engineer **Jun 2018 - Sep 2021**
Interswitch Group - Lagos, Nigeria

- Built production Android applications for custom terminal hardware, supporting secure transaction workflows across multiple Android OS versions and OEM device environments.
- Developed and maintained reusable Android SDKs and integration layers, reducing implementation effort for external developers and partner teams.
- Validated app behaviour across Nexgo, PAX, Verifone, Dspread, Ingenico, Sunmi, and other Android devices to improve release confidence and device compatibility.
- Improved platform stability through refactoring, targeted performance fixes, root-cause analysis, and support for complex third-party API integrations.

EDUCATION & CERTIFICATIONS

BSc. Electronic and Electrical Engineering: Obafemi Awolowo University, Ile-Ife | 2013 - 2018
Postgraduate Studies, Business Administration and Management: Grace Polytechnic | 2021
Certifications: Payment Card Industry Qualified Integrators and Resellers (2019); Google Africa Developers Scholarship - Android Stack (2020); ITIL Foundation v3 (2019)
Professional Development: Jetpack Compose Masterclass (2025); Multi-Modular Kotlin Multiplatform Masterclass (2025); Industry-Level Android App Development and Testing Large-Scale Multi-Module Android Apps - PL Coding (2024)
